

# CHOICE PARTY

We now introduce the new third party, The Choice Party. This new party supports the ideology of individual rights or simply stated the right to choice. This means total individual liberty in most or all areas of government. This includes pro-choice for abortion, pro-drug legalization, pro-gun rights, etc. Also, economically, the party believes in economic freedom where the individual has more of a choice, traditionally known as *Laissez-Faire* economics, or to let the government leave the economy alone. This party is a middle of the line party and it targets younger audiences 18-30 especially.
